

BRENDA L. BRYANT

Brenda Bryant is the niece of Ezekiel Taylor. She is a project manager in the Office for Research Information Technology (ORIT) at Northwestern University.

She provides leadership and supports the strategic direction in the design, creation, and deployment of cross-functional business problems and opportunities for Northwestern's research enterprise environments.

Brenda has worked at Northwestern University in information technology for the past 26 years; first, in The Graduate School as a programmer/system analyst, and currently, in the Office for Research as a project manager lead. She has led major research project implementations and integrations, such as the Learn@Northwestern digital training management system, the initial Electronic Institution Review Board system (eIRB for Human subjects research), along with the legacy systems. She has led the enhancement and support for the Northwestern Safety Information System (NSIS), and the Electronic Sponsored Projects Request system (ESPR).

Brenda has participated in several Northwestern University Staff Leadership programs and Northwestern's Kellogg School of Management-Executive Education. She holds a Bachelor of Science degree in Radio, TV and Film at the University of Wisconsin-Madison. She is currently a volunteer and champion for hunger prevention, and an avid runner, participating in races that support charitable causes.

Brenda loves reading and studying the Word of God. She teaches Sunday School at the Ruth Thurston Institute on Biblical Studies.
